

NEW!

Disprax has developed a new interface to TIMMS – TIMMS Client – rejuvenating the software’s appearance to incorporate the usability of windows applications across the TIMMS suite of modules.

TIMMS Client is not only a transformation of the front-end of TIMMS making it modern, user-friendly and intuitive but updates have also been made to TIMMS functionality to improve some areas of the software in line with the new look.

Your TIMMS users will love the new interface and the productivity they gain as a result!

“The TIMMS engine has always been like a high performance racing car but now it has a ‘chassis’ to match and we’re all really pleased with the new direction.”

Paul Gallo, Managing Director

FEATURES OF TIMMS CLIENT

- Multiple TIMMS modules can be open at the same time making it easy to access functions across modules without the need of returning to the Main Menu.
- Multiple desktop shortcuts for the TIMMS Client can be set-up to obtain direct access to specific modules. This allows the Main Module to be bypassed for users who only operate in a few modules.
- If your company operates in multiple TIMMS companies’ then the defaulting company can be set by operator.
- Extensive enquiry and lookup functionality consistent across all modules including searching on open documents (invoices, POs etc) and a new look Stock Enquiry.
- Reports can be extracted to text files, stripping out page and field headings and totals, so they can be easily manipulated in Microsoft Excel®
- A default “save” directory for reports can be set on the PC.
- Instant connectivity to email and websites.
- Ability for Notepad style editing of comments.
- Multi-line display with alternate shading and Display colours controlled by the user for more readable display of data on the screen.
- Date selection using calendar function as well as entering date directly.
- Direct access to the Support Portal for logging support issues via the Disprax Web page.
- Optional auto (popup) help options for fields.
- Use of Windows key functions such as HOME, END and arrow keys for familiar navigation.

BENEFITS OF TIMMS CLIENT

- Greater multi-tasking possible with multiple session capabilities
- Tailor access to permitted functionality for specific users and avoid having to return to the main menu
- Reduce lookup and setting time for widely used Company variables
- Faster execution of business processes through more efficient TIMMS processing
- Quicker and easier extraction of data from TIMMS for further manipulation
- Enhanced display options for greater screen readability and useability
- Intuitive interface with a windows look and feel
- Increased productivity
